

THE BOB MADGE INNOVATION AWARD

Bob Madge loved to fly. Aviation coalesced his gifts as a pilot and engineer, and he excelled as both. He worked as he lived -- letting his ideas fly.

Bob's methods were simple: devote time to study and analysis, never accept the norm, and a strong belief in letting the data present the results. He innovated. He shared what he learned. He encouraged others to think, to participate, to rise above the norm and innovate...

The Bob Madge Innovation Award recognizes “Innovation that Matters” in the area of Semiconductor Design, Test and Data Analysis. Nominations are invited from all active researchers, academicians, and industry personnel for this award instituted in the respectful, enduring memory of our colleague, Bob Madge (1963-2014).

The award celebrates exemplary research meeting the following criteria:

- **True innovation that is changing the industry**
- **Solutions that challenge existing approaches**
- **Fosters broad adaptation and open collaboration**

The nominations must be for research work concluded or with significant results published in the past five years. This annual award will include an honorarium and memento, and will be presented at the International Test Conference (www.itctestweek.org). The selection committee is a diverse team representing a cross section of renowned industry and university researchers.

For detailed information about the submission process, requirements, the selection process and any other questions regarding the award program, please send an email to those specified in the contact information at the bottom. A nomination form for the 2017 Award will be available next year.

Please see below for key dates.

- May 18, 2016 – Call for nominations.
- July 15, 2016 – Nomination submissions closed.
- October 2016 – Selection committee makes final decision.
- November 15, 2016 – Winner announced at the 2016 ITC.

Thank you for your nominations. We look forward to celebrating your Innovation at the International Test Conference in November 2016.

Please contact Phil Nigh (nigh@us.ibm.com) or Rao Desineni (rao.desineni@globalfoundries.com) if you have any questions about this award.

Past Winner:

Friedrich Hapke, Director of Engineering, Mentor Graphics, Hamburg, Germany (2015).
